Cloud-Based/Internet Monitoring
System for Your Grain Bins CheckItNow.us

Our CheckItNow.us system will allow you to monitor and control your bins/sites through the Internet Cloud using your smart-phone or computer. In addition, you can set alarms and notifications that are sent to you through email or text message warning you of danger. Lastly, you can see temperature trends in each of your bins eliminating hot spots before they happen. We have proven there is a simpler, faster, smarter way to monitor and control your bins/sites through our hundreds of happy customers.

Benefits:

- **Monitor Your Bins Anywhere, Anytime, Anyplace:** The RDI System will monitor and control your bins regardless of the location, time, or placement.
- *Reliable and Proven Service You Can Count On:* Hundreds of happy customers who trust and rely on our service to monitor and control their bins.
- *Set Real-Time Alarms and Notifications:* You can set the high/low set point temperature alarms and receive notice via email or text messaging to warn you of any danger.
- *System Tailored to Your Specific Needs:* System is designed to meet your unique and individual needs.
- *Always Upgraded to the Latest Technology:* Devices are automatically updated to provide the latest monitoring technology with a lifetime warranty.
- *Bin and Site Historical Reporting:* You can access historical temperature values to see trends across bins and sites.
- *No Bin/Site Limitations or Restrictions:* No limitations on the amount of bins or sites that can be monitored. We will set you up with your own private access to your on-line data. You also have the ability to have an unlimited number of users that can access your on-line data.
- *Superior Quality & Value:* Diverse knowledge of technical and automation service as well as consulting for your individual needs.

Cloud-Based/Internet Monitoring
System for Your Pump Stations TankVitals.com

TankVitals.com system user,
Congratulations on investing in the TankVitals system, a great investment in your business towards winning more bids and being successful in a challenging economy.
Your TankVitals web site has been aligned to the leading cloud service and database development. As a result, you can have instant access to accurate and up-to-date pump panels parameter readings.
You now have the ability to interface with the thousands of pump controls using the L2C Cellular device as your partner to help them increase their profitability through accurate pumping practices.
TankVitals is user-friendly, fully Internet-based using Cellular technology. Customers of RDI say one of the best things about it is the Life time warranty. As new technology emerges we are able to upgrade the devices to maintain complacency.
Key Features:
- Internet-based Cellular access is all you need to get the data to and from the field.
- Update you TankVitals systems with software that is always current.
- Cut down your on-site service calls.
